#### **ENGINEER**

State regulatory agency seeks Utility Engineering Specialist III/Utility Regulatory Engineer I to perform analysis related to energy issues that affect Missouri's investor owned utilities and their customers.

The position requires general knowledge of the utility industry in the areas of transmission, distribution and safety, and a working knowledge of engineering principles, mathematics, statistics and computing. It also requires the ability to assist in formulating research strategies and selecting and applying the appropriate analytical methods or computer models to provide high quality information to decision makers. A high level of both verbal and written communication skills and the ability to explain and interpret the results of complex technical information to both technical and non-technical audiences is required.

Graduation from an ABET accredited college or university with a bachelor's degree in engineering or equivalent, and four years of responsible utility related experience or training. PE eligibility in Missouri required. Experience with spreadsheets and word processing is essential. Other computer simulation and database experience is also preferred. The ability to work well in a team environment a must.

Starting annual salary is \$46,356. To be considered for this position, please submit an application, resume, transcripts and one or two page technical writing sample by **November 19, 2004** to the Missouri Public Service Commission, Human Resources Manager, **Reference Number UO131004**, P.O. Box 360, Jefferson City, Missouri 65102. For additional information please visit our website at <http://www.psc.mo.gov>.
